

Unfair Formulary Changes:

ADVISING EMPLOYERS ON UNNECESSARY RISKS WHEN SELECTING PHARMACY BENEFIT COVERAGE

PART TWO OF A TWO-PART SERIES ON NON-MEDICAL SWITCHING

Healthy patients make productive employees, which makes for great business.

Yet, pharmacy benefit practices, such as non-medical switching, can endanger the health of employees and result in liability for employers.

Learn how to advise employers in preventing unfair formulary changes to their corporate insurance plans and pharmacy benefits in [this free Webinar](#).

FREE WEBINAR

Wednesday
AUG 2, 2017
12PM-1PM ET

Join our speakers in examining the potential hazards and adverse consequences of non-medical switching:

An insurance practice that forces stable patients to abandon their treatment for lower-cost alternatives. These mid-cycle formulary changes may disrupt a patient's delicate clinical equilibrium, resulting in higher cost health care utilization and missed work days, as well as increase employers' potential exposure to liability.
