

STRATEGY & GOVERNANCE	
Is there a state agency or taskforce responsible for AI regulation or development?	Yes. The Kansas Legislative Artificial Intelligence Task Force is a 14-member team created to proactively identify opportunities, risks, and recommendations related to AI and to serve as an expert advisory board to legislative requests. <sup>211</sup>
Is there an enacted AI law or regulation that applies to health insurance?	No. However, H.B. 2313 (2026) prohibits all medical and research facilities in the state from using genetic sequencers or operational or research software used for genetic analysis produced in or by a foreign adversary or affiliated entity. <sup>212</sup> The law also prohibits state agencies from allowing employees to access AI platforms of concern on state-owned or state-issued electronic devices. <sup>213</sup> Prohibited countries of concern or foreign adversaries include China, Cuba, Iran, the Democratic People's Republic of Korea, Russia, and Venezuela. <sup>214</sup>
Is there an official state strategy on AI?	Yes. Kansas has issued a policy governing acceptable use of generative AI for Executive Branch agencies. <sup>215</sup>
CONSUMER PROTECTIONS	
Is there a state data protection law that applies to AI use of personal data?	No.
Is human oversight of AI required?	No.
Is there a consumer complaint mechanism available?	No. However, consumers can <a href="#">file a complaint</a> with the Kansas Department of Insurance if they believe AI has been used improperly within their health insurance.
Has the state insurance commissioner adopted the NAIC Model Bulletin or a similar bulletin?	No.
FUTURE READINESS	
Are there state-based advocacy groups related to AI in health insurance or health care?	Yes. Kansas Health Institute, Health Resources in Action, Wichita State University Community Engagement Institute partnered to inform AI in health policy development. <sup>216</sup>
Are there state-funded training opportunities on AI?	No.
